

## **TOGAF® 9.1 Foundation**

**2-day course**

See [www.unicom.co.uk](http://www.unicom.co.uk) for upcoming course dates and locations

### **Background:**

TOGAF9® is the foremost generic framework in the field of IS/IT Architecture. It contains substantial guidance on what to do to establish an architecture practice and then how to use it in connection with planning the longer-term transformation of the enterprise (strategic architecture), and designing capabilities to support it.

### **Objectives:**

The course examines the essential features of the framework. It also spans the Learning Points required to take the TOGAF® Level 1 exam, and during the course delegates will be helped to prepare for this exam.

For full details of the TOGAF™ certification scheme, visit the following link:  
<http://www.opengroup.org/togaf9/cert/docs/indiv.tpl?CALLER=index.tpl>

### **Target Audience:**

This course will benefit anyone interested in the most fundamental aspects of TOGAF®. They may already work within the architecture field, or have any other role which may require appreciation of Enterprise Architecture.

### **Examination:**

TOGAF™ 9 Level 1 exam. A voucher will be provided to enable delegates to arrange to take it at a Prometric Test Centre. The course fee includes the cost of the exam vouchers, and those successful in the exam can gain membership of the Open Group.

### **Pre-requisites:**

There are no formal pre-requisites for this course and certification.

### **Delegates will learn:**

This course will enable delegates to understand all the key Parts of the Framework:

- The Architecture Development Method (ADM) - architecture process
- Guidelines and techniques for using and adapting the ADM
- The Architecture Content Framework - how to describe architecture
- The Enterprise Continuum - a classification system for architecture assets
- TOGAF™ 9 Reference Models - the "building blocks" of an Information System
