

# One Day Session Agile Leadership Workshop

A continuous dilemma. The teams are struggling, the client is not really happy, you feel (and you maybe even are) poorly informed and you can see disaster coming. Your contract is under pressure and so are the financials. What to do...?

You feel and suspect the scope is increasing all the time, you have no idea what the success factors are to get grip again. Your reporting does not bring you what you think you need, and you are dazzled by so called Agile dogmas and don't know what leadership style to apply.

This session will help you to identify what you can do to facilitate your team back to success. Topics can be contracts, changing requirements in fixed price contracts, reporting in an integrated environment, how to start up a project, when to be able to name a price and how you can staff your team in a very useful way. Also end-to-end work, discipline, multi members, etc. can be topics. What the topics will be depends on the participants.

"Overall, this was an excellent workshop, one of the best I have ever attended. It was both educative and fun." - Anton Vreugdenhil, managing director Cegeka DSA
