accredited by APMG

*These courses are available as a combined **3-day Foundation** and **4-day / 5-day Practitioner** course. Alternatively, it is possible to take the Foundation or Practitioner course separately.*

See www.unicom.co.uk for upcoming course dates and locations

Background:

The Agile Project Management training course is a stable-mate to PRINCE2, ITIL and Managing Successful Programmes, with accreditation and certification by the APM Group to both Foundation and Practitioner levels.

Agile can be applied to projects regardless of scale or discipline. Agile Project Management shows Project Sponsors they can adopt Agile with confidence, and provide focus to the entire project team.

You can choose to attend 3 days of the course leading to Foundation Certification or 4 days covering both the Foundation and Practitioner Certification.

Agile approaches such as eXtreme Progamming, Scrum and Lean Software Development are becoming increasingly mainstream. They describe how to successfully deliver in complex situations when requirements and possible solutions are subject to continuous change; but they stop short of describing a full project lifecycle with defined Phases, Work Products, Roles and Responsibilities.

This course covers how to operate in such an Agile fashion within an overall project framework which is accredited as a stable-mate to PRINCE2 and based on the DSDM Atern approach. Through practical experience of the Agile style of working, case studies and example scenarios from a highly experienced trainer, it provides delegates with an understanding of how the Agile Project Management process can enable planning, management and control for predictable Agile project deliveries.

Who Should Attend:

The course is aimed at Project Managers and others involved in Project Management who want to understand how to apply Agile approaches within an overall Project Management Lifecycle framework.

The new Agile Project Management certification, accredited by APMG, offers a boost to your career. As a Certified Agile Project Manager you become an invaluable asset to your employer and clearly differentiated in a competitive market.
