6. Tools and Technology for Service Design
7. Implementation Challenges, CSFs and Risks

The ITIL® Intermediate Certificate in Service Design forms part of the Lifecycle series of Intermediate certification modules, which can be taken as stand-alone qualifications or with a view to amassing sufficient credits to gain the ITIL® Service Management Expert qualification. It will give candidates a deep level of understanding of Service Design processes and roles.

This course is intended to enable delegates with a Foundation-level knowledge of IT Service

Management to apply good practice in processes pertaining to the Service Design lifecycle phase. The course is interactive, combining presentation sessions and group exercises, with plenty of opportunity for questions and discussion. On completion of the course and the required personal study, delegates will be able to sit the ITIL® Intermediate examination in Service Design worth 3 credits.

Content

This course will enable participants to:

- Understand the importance of Service Management as a Practice
- Understand Service Design Principles and Processes
- Carry out common Service Design activities
- Organize Service Design effectively; Recognise Service Design functions and technology related activities
- Understand how to implement Service Design
- Understand and analyse challenges, Critical Success Factors and risks related to Service Design.

Target participants

This course is aimed at individuals who have attained the ITIL® Foundation certificate in Service Management and who wish to advance to higher level ITIL® certifications. It will give delegates a detailed understanding of the ITIL® Service Design phase of the ITIL® core lifecycle and how it may be implemented to enhance the quality of IT service provision within an organization.

Individuals who may find this course of interest include IT professionals working within or about to enter a Service Design environment and requiring a detailed understanding of the processes, functions and activities involved, as well as those who are seeking the ITIL® Expert qualification in IT Service Management.

Before attending this course

Our examination provider, ISEB, requires that you bring with you to the course your ITIL® Foundation certificate number. It is imperative that you do so, as you will not be eligible to take the exam at the end of the course if you do not produce your certificate number. If you took your ITIL® Foundation exam with ISEB and cannot locate your certificate or number, you can call them on 01793 417419 to obtain your number. If you took your ITIL® Foundation exam with another examining body (e.g. EXIN), then please scan and email a copy of the certificate to your training booker.

Pre-work

Delegates are required to undertake preliminary study using FGI's electronic pre-course documents.

From our experience, delegates who complete all of the pre-course reading are statistically more likely to be successful in the examination and are able to interact more effectively with the course trainer. We recommend you spend approximately 21 hours completing this.

Further self-study is also expected during the evenings of each day of the course.

ITIL® is a registered trade mark of the Cabinet Office

Course Cost - £799.00
